

ABSTRACT

5 The recording apparatus of the present invention
includes: a file generating section for receiving video data
and audio data and generating a video data file and an audio
data file; a dividing section for dividing the video data
file into a plurality of video data elements and dividing
the audio data file into a plurality of audio data elements,
an arranging section for arranging data such that the video
10 data elements and the audio data elements are recorded within
a predetermined recording unit; and a recording section for
recording the arranged data on an information recording
medium.
